

Phonons: Theory and Experiments II

Filesize: 9.28 MB

Reviews

This is basically the greatest pdf i have got go through right up until now. It normally fails to cost excessive. Once you begin to read the book, it is extremely difficult to leave it before concluding. (Genoveva Langworth)

PHONONS: THEORY AND EXPERIMENTS II

[DOWNLOAD](#)

Book Condition: New. Publisher/Verlag: Springer, Berlin | Experiments and Interpretation of Experimental Results | The first part of this three-volume treatment, Phonons: Theory and Experiments I, has been devoted to the basic concepts of the physics of phonons and to a study of models of interatomic forces. The present second volume, Phonons: Theory and Experiments II, contains a thorough study of experimental techniques and the interpretation of experimental results. In a third volume we shall treat a number of phenomena which are directly related to lattice dynamics. The aim of this treatment is to bridge the gap between theory and experiment. Both experimental aspects and theoretical concepts necessary for an interpretation of experimental data are discussed. An attempt has been made to present the descriptive as well as the analytical aspects of the topics. Although emphasis is placed on the experimental and theoretical study of the dynamics of atoms in solids, most chapters also contain a general introduction to the specific subject. The text is addressed to experimentalists and theoreticians working in the vast field of dynamical properties of solids. It will also prove useful to graduate students starting research in this or related fields. The choice of the topics treated was partly determined by the author's own activity in these areas. This is particularly the case for the chapters dealing with infrared, Raman and inelastic neutron spectroscopy, as well as for some newer developments such as the optical spectroscopy of thin films and adsorbates. | 1. Introduction.- 1.1 General Remarks.- 1.2 Infrared Spectroscopy.- 1.3 Raman Spectroscopy.- 1.4 Brillouin Spectroscopy.- 1.5 Interactions of X-Rays with Phonons.- 1.6 Inelastic Neutron Scattering.- 1.7 Other Techniques.- 2. Infrared Spectroscopy.- 2.1 Experimental Techniques.- 2.1.1 Grating Spectrometers.- 2.1.2 Fourier Interferometers.- 2.2 Dielectric Properties: Classical Treatment.- 2.2.1 Reflectivity, Transmission, Absorptivity and...
