One is floored in the attic, the other is not. In one the workmanship is No. 1, the other is just thrown together. A house on paper is one thing, the realization of this house on its foundation is another thing entirely. The same is true of the actual installation of the pipes and fittings. One riser requires an offset, a main interferes with a beam, a difficult radiator connection has to be made, and almost innumerable other difficulties arise all of which demand good judgment based upon a thorough knowledge of the subject It is probably true that the heating profession calls for the exercise of more good gray matter and real common sense than almost any other line of engineering. The universities have realized this fact for some time and many of them have offered courses in the subject. These courses,...
