

## Petit Musee de Litterature Francaise. Gems of French Literature in Prose and Verse, with Notices by M. Le Page

Filesize: 5.58 MB

### ***Reviews***

*This type of ebook is everything and got me to seeking in advance plus more. it was writtern really completely and helpful. You wont feel monotony at at any moment of your respective time (that's what catalogues are for about should you request me).*

*(Dr. Santino Cremin)*

## PETIT MUSEE DE LITTERATURE FRANCAISE. GEMS OF FRENCH LITERATURE IN PROSE AND VERSE, WITH NOTICES BY M. LE PAGE

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 58 pages. Original publisher: Aberdeen Proving Ground, MD : Army Research Laboratory, 2007 OCLC Number: (OCoLC)227933882 Subject: Communications, Military -- Automation -- Testing. Excerpt: . . . The purpose of the present and third investigation in the series was to quantify the effects of combining cueing techniques on Soldier performance and workload. One unimodal ( i. e. , Visual Only ) and four multimodal cues ( i. e. , Visual Spatial Language, Visual 3-D Audio, Visual Tactile, and Spatial Language Tactile ) were evaluated. The following were hypothesized for this investigation: H1: Reaction time ( time from cue presentation to movement of crosshairs ) is expected to be faster in the Visual Tactile and Visual 3-D Audio conditions because the tactile and the 3-D audio cues will arouse attention and both cues in each pair provide an immediate indication of the direction to slew to acquire the target. The spatial language cue does not provide an immediate indication of slewing direction, nor does it have the attentional value of the 3-D audio and tactile cues because of the potential for interference by the visual and auditory communications. Therefore, reaction time is expected to be slower in the Visual Spatial Language and the Spatial Language Tactile conditions, but no significant differences are expected between these two modes and the Visual Only condition. H2: Cue condition is not expected to affect time to slew to the location of the target ( i. e. , time to first shot minus reaction time ) because each of the five conditions includes a cue that directly indicates the clock position of the target ( i. e. , visual and spatial language ), thus, reducing uncertainty that can slow slewing speed. H3: Time to...
