Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Field and Laboratory Note Book in Physical Geography Laboratory work in Physical Geography has for some years been in a transitional stage that is now approaching but has not yet reached a regular routine similar to that of the chemistry or physical laboratory. Many teachers have been working out a series of laboratory exercises for their own classes. Some of these that have proven more or less successful have been published as an aid to other teachers. Professor Merrill adds a manual to the list that appears to fill a need in the schools arising from the fact that some of the manuals already published are too elementary and some are too far advanced. That is, some of them require too much purely mechanical work, giving the impression that the object is to occupy the hands of the pupil regardless of whether the exercise illustrates any principles or leads to any conclusions. The other class of manuals presumes too much on the previous knowledge and experience of the pupil for the early years of the school. This gap between the two kinds of manuals appears to be filled better by Professor Merrill s book than by any other that I have seen. It likewise is wider in its scope and covers the whole field of Physical Geography more thoroughly than any other. It is a step in the right direction and I hope it may prove serviceable to all who use it. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to...
