Bertrams, 2004. Gebundene Ausgabe. Book Condition: Neu. Gebraucht - Sehr gut Unbenutzt. Schnelle Lieferung, Kartonverpackung. Abzugsfähige Rechnung. Bei Mehrfachbestellung werden die Versandkosten anteilig erstattet. - CCSP Self-Study: Securing Cisco IOS Networks (SECUR) provides a comprehensive guide for the new Cisco Systems CCSP SECUR 642-501 exam. It is also a reference for security practices, protocols, software, and equipment that work on or in conjunction with Cisco IOS equipment to provide layers of security to networks. Primarily based on the newest version of the SECUR course, this guide will serve readers as a valuable study aid and continue as an invaluable theory and configuration guide for years to come. Coverage includes new IOS features, Cisco Secure ACS (Access Control Server), advanced AAA (Authentication, Authorization, and Accounting) security topics, the Cisco IOS Firewall, VPNs, IPSec using Cisco routers, IKE (Internet Key Encryption), Crypto ACLs, NAT (Network Address Translation), and IPSec VPNs using Cisco routers, as well as the newest topics covered in the latest course, Cisco Easy VPN and Security Device Manager (SDM). A case study enables readers to walk through a scenario and help determine a real-world solution. How the book will differ from the previous edition: This book replaces the existing Managing Cisco Network Security (1578701031) book, which was based on the previous version of the course by the same name. This new title contains approximately 90 percent new material as compared to the previous edition, providing updated information on the CCSP certification and covering the new IOS features developed since the first edition appeared 820 pp. Englisch.
